Energy Efficiency Strategy in Building Sector

31 – October 2007

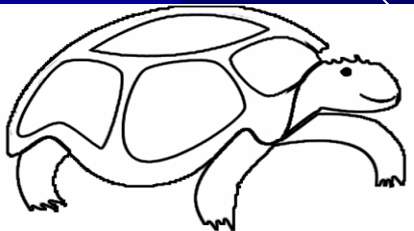

1. العملية التشريعية

Legislation Process

Element 1: Legislative and
regulative measures

2. العملية التطبيقية

Implementation Process

1. Legislation Process

Issuing laws and legislations to obligate investors in buildings sectors to compliance with the building energy efficiency code.

- **First step:** The final code is revised and issued.
- **Second step:** collect the feed back and answer clarification.
- **Third Step:** The code and the Policy Paper should be approved by the Minister of Local Government as he is the head of the Higher Council of planning and to be presented to the Prime Minster.

2. Implementation Process

Fourth Step: The code and the Policy Paper will be sent to all the Municipalities and village council for implementation

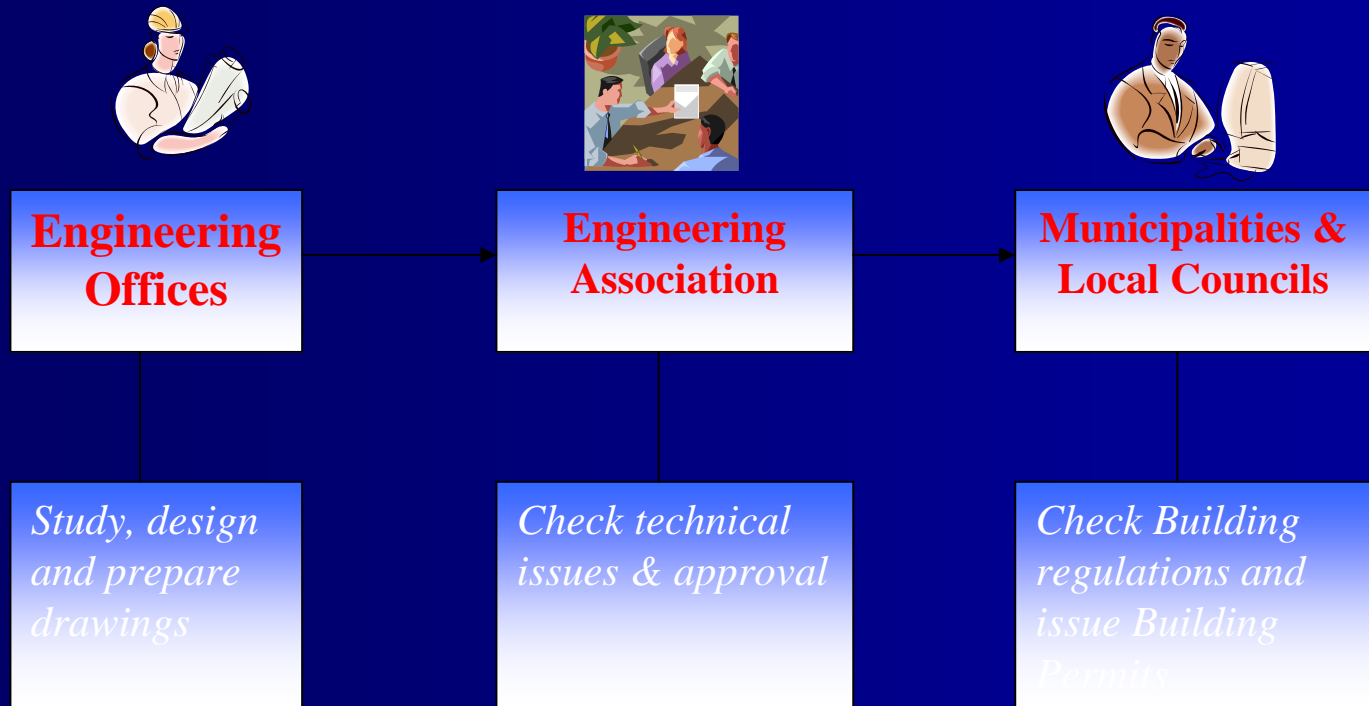

- **Implementation:**
 - The **engineering offices** are responsible for studying, designing, and preparing drawings.
 - The **engineering association** checks technical issues from engineering offices and give approval.
 - The **municipalities and local councils** check building regulations and issue buildings permits.

- **Construction and Utilization Stage:**
 - The construction stage will be the responsibility of the **supervisor engineers, municipalities inspectors** and the **owner** of the building. Final checking will be done by the Engineers of the **Municipality** and the **local and regional councils** before issuing the utilization permission for the owners.

المسؤولية عن تطبيق كود العزل

Responsibility - Implementation

Implementation Plan

- Plan of implantation regarding When to be obligatory and How (incentives or/and penalties).
 - The code was to be obligatory in the Public Buildings on 1/6/2008, in the Private Buildings with area than 2000 m² on 1/6/2009, and in the private sector buildings with the area less than 2000m² on 1/6/2012.

What is Needed

- Policy Paper.
- National Campaign.
- Training Programs.
- Pilot Projects (Public Buildings).

Establishing Adaption, and Implementation of Energy Codes for Buildings

• ECB Project

• Local Project Survey

• Library

• Training & Workshops

• Laboratory

• Software

• Legislative

• Photo Album

• Casa Stuby Pilot Project

• Public Awareness

• Passive Solar Design
